

Figure 1. Canadian Gold JV's Domain, Manitoba and Savant Lake, Ontario

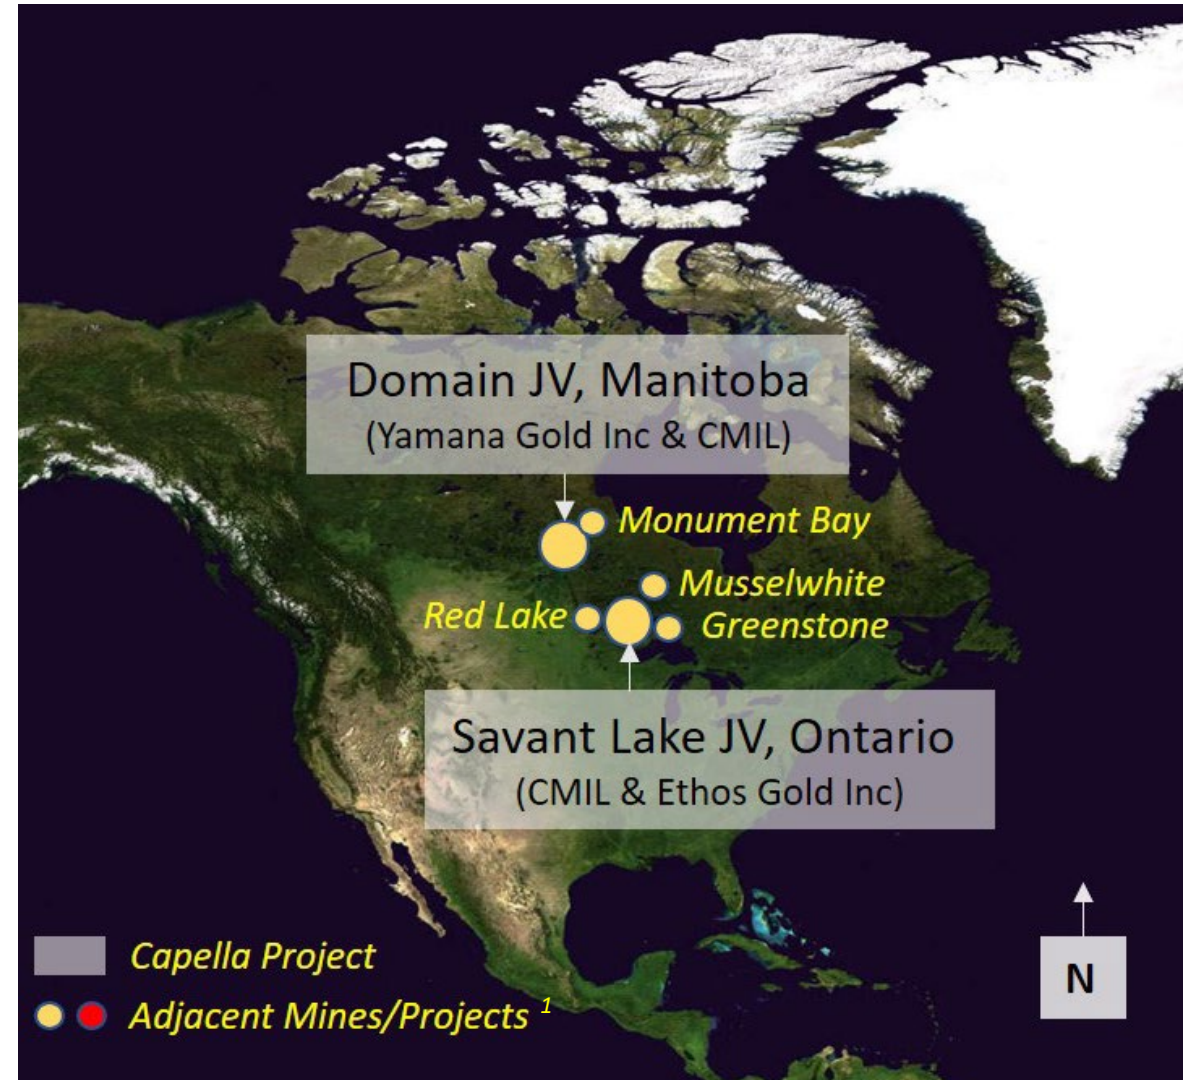

Domain Gold JV Project, Manitoba

- Joint Venture: Yamana 70.4%, Capella 29.6%. **Pro-rata project funding, CMIL budget CAD 450K for next stage work program.**
- Advanced-stage exploration project with 62 holes / 9,660m of diamond drilling completed to date
- Targeting high-grade iron formation- and shear-hosted gold
- 800m of strike partially tested at “Main Zone”, 5+ km of prospective strike extensions remain to be tested
- FN agreement completed, drilling expected H2, 2021

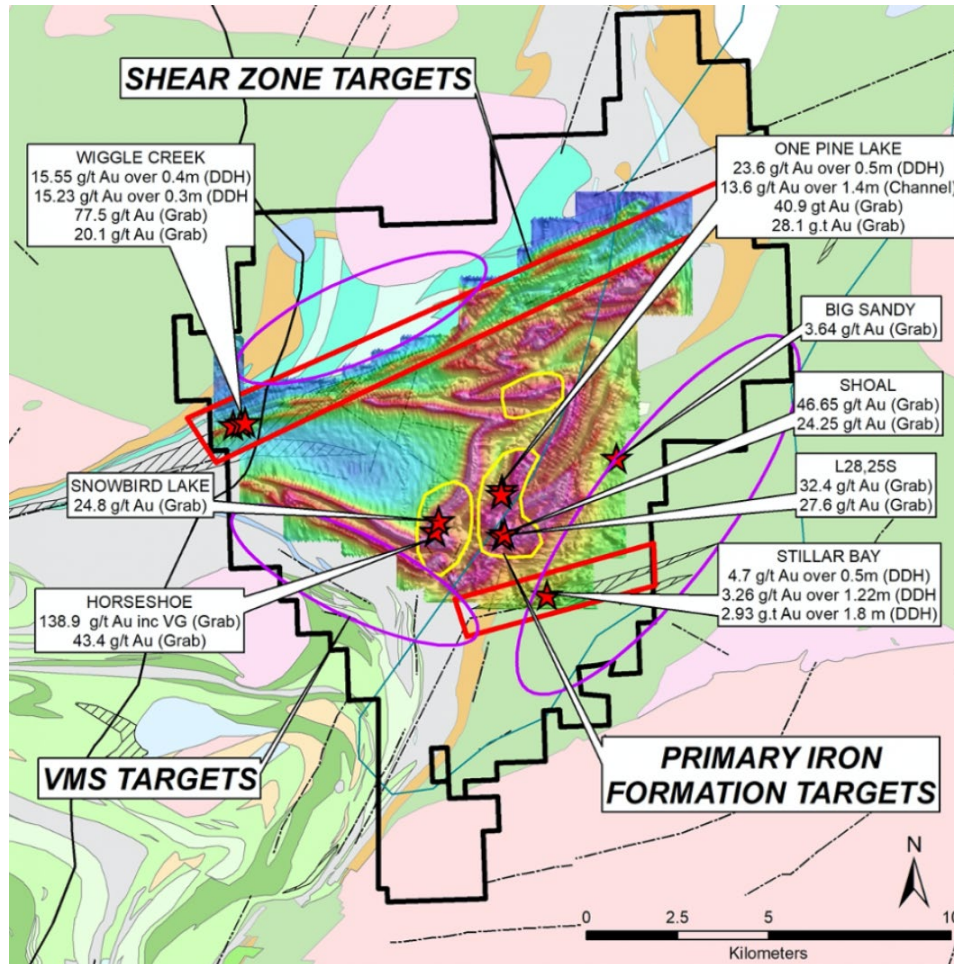

Savant Lake Gold JV Project, Ontario

- **Ethos Gold funded work program**
- Large (229 square km) strategic landholding in NW Ontario
- Ethos Gold earn-in JV signed in September, 2020. May earn-in to a 70% interest in Savant Lake in exchange for staged work commitments (CAD2M) and cash/share payments to Capella
- High-grade, iron formation-hosted gold mineralization
- Recent discoveries nearby confirm potential of Ontario's greenstone belts for major gold and VMS deposits
- Drilling expected Late-2021

¹ Mineralization hosted on adjacent and nearby properties is not necessarily indicative of mineralization that may be hosted on the Company's Savant Lake and Domain projects.

Figure 2. Savant Lake Gold JV Main Claim Block and Q4, 2020 Heliborne Magnetic Survey

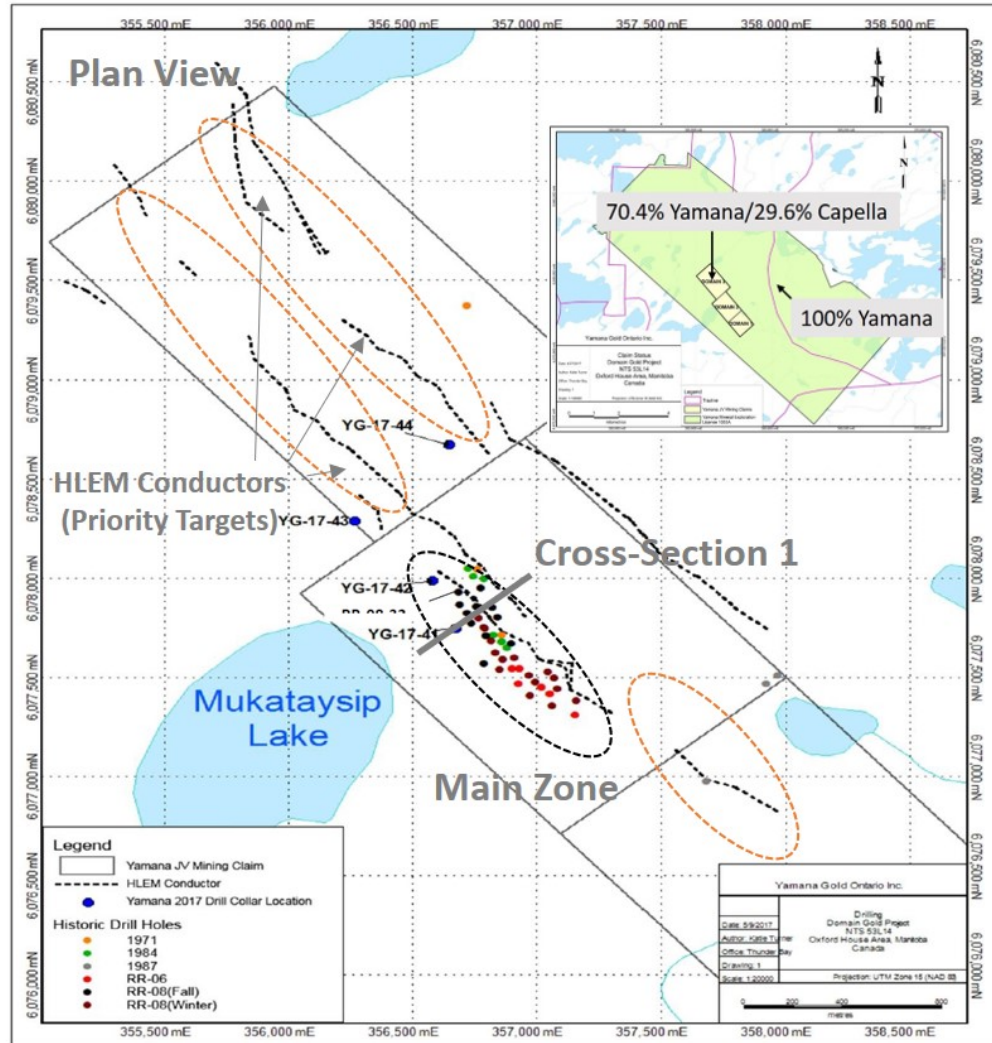

Savant Lake Property and Key Gold Showings ¹

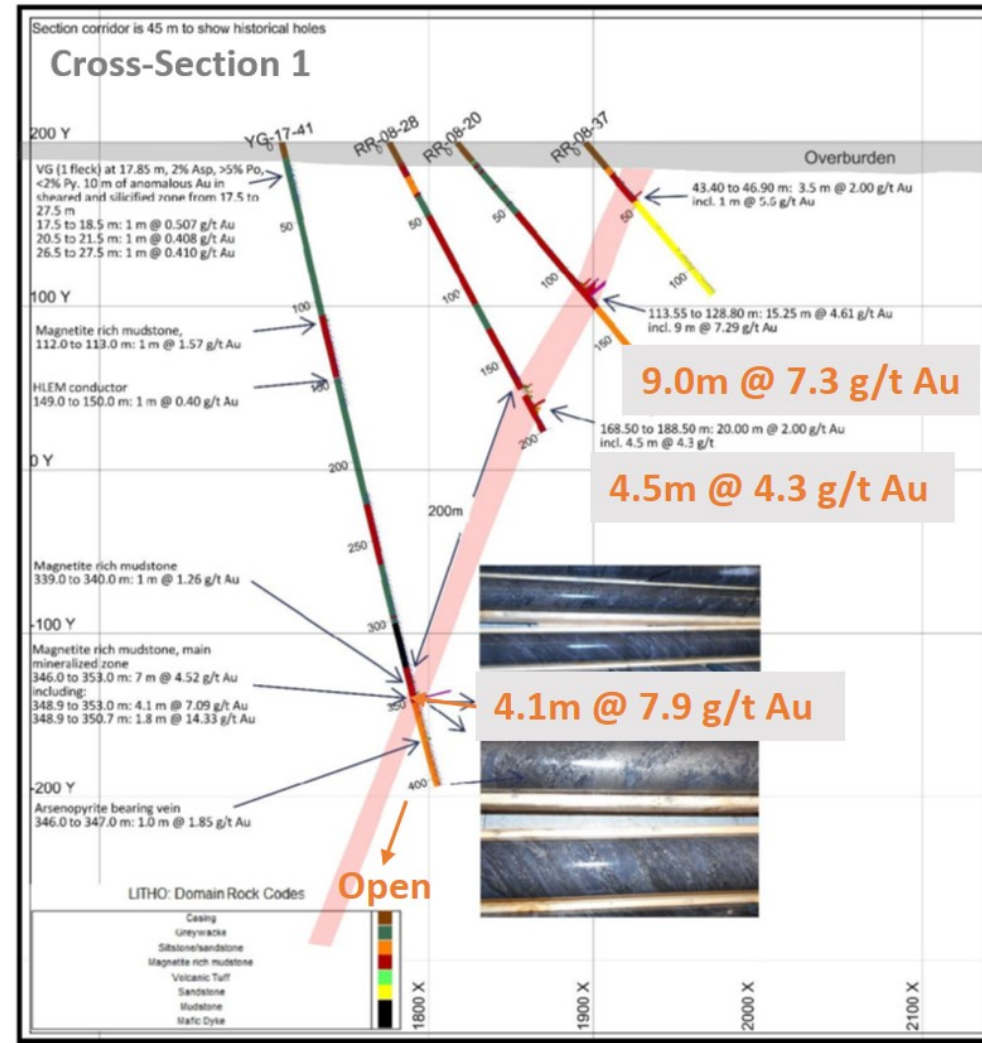

Mineralized Iron Formation, L28 Showing

¹ DDH=Diamond Drill Hole, Grab=Grab sample. Grab samples are rock samples taken to understand which structures and veins are mineralized and contribute to understanding the geometry and nature of mineralization. While they provide an insight to tenor of mineralization, they do not represent a true indication of the overall grade of a prospect.
